

Omnistar G2 (GLONASS) Corrections

Many growers run Omnistar XP, a correction that is 3-4" repeatable accuracy and is \$880 a year or \$550 for 3 months. It has proven to be one of the most popular and widely used corrections that we see. There are some issues that I, as well as many others have seen over the years, most coming down to long initial convergence times, and problems with losing convergence mainly along structures or tree lines and then the re-convergence time.

GLONASS, a Russian space based navigation system similar to the United States GPS is widely used in agriculture today. Many correction types like Rangepoint RTX, Centerpoint RTX, VRS networks, and RTK are utilizing GLONASS for improved convergence times and sometimes improved accuracy.

Omnistar has an option to use Glonass for faster convergence times, and less downtime due to losing satellites near structures or tree lines. It is called Omnistar G2 and it is the same accuracy and yearly price as Omnistar XP, it just gives you availability to more satellites, so that you can converge up to 33% faster as well as being 33% less likely to lose convergence by interfering objects.

This option is only available for receivers that are GLONASS capable. Some receivers like the CFX 750 and the FMX display require a \$728 one time unlock (used to be a \$2,000 unlock) to utilize the GLONASS feature. AG 372 receivers, and TMX 2050 displays include GLONASS in the base option so when using Omnistar corrections with these receivers, be sure and choose Omnistar G2 as your subscription type when purchasing, and as your correction option on the receiver when setting up. Some receivers like an EZ Guide 500, Ag 252 or 262 do not have availability to use GLONASS. If you have any more questions or would like to try a free 3 day trial of Omnistar G2, let me know.

Used and Overstock Items for Sale

(I can email pictures if interested)

- New FieldView Module only for Gen1 20/20 display- \$400 (regular price is \$800)
- Used WAAS FMX display with used antenna, power cables, Ram mount and new GPS cable and antenna plate- \$3,500
- Used RTK/ GNSS/ VRA unlocked FMX display with used antenna, power cables, Ram mount and new GPS cable and antenna plate- \$5,500 (add a used 900 MHZ radio and antenna cable for \$1,300)
- New Wavevision Seed Tubes for a JD 7000 or Kinze- \$120 (regular price is \$140)
- New Standard eStet Meters- \$105 (regular price of \$122)
- New vSet classic meters- \$160 (regular price \$190)

- Used Nav2 AutoPilot Controller for a generic aftermarket AutoPilot= \$3,850
- New OmniStar Unlocked Ez Guide 500, Display with used power cables and antenna= \$2,250
- 12 Used Wavevision Seed tubes for a 7200/1700/17X5 Series, Year 2012+ Kinze 3000= \$80
- Ez Guide Plus or Ez Guide 500 Control Keypads (New)= \$50 or (Used) \$30
- Trimble WM Topo Solution Kits= \$12,000
- Trimble SiteNet 900MHZ RTK Radio Repeaters= \$900
- Trimble Nomad 800LC Kit= \$400
- 24 eSets with 1.6 bu Hoppers= Make Offer
- 31 ProMax40 Meters w/mini hoppers, 16 corn crop kits and 31 soybean crop kits. (off of a JD 1790)= Make Offer
- 24 used Martin 1360 Cleansweep Brackets (pn 755200)- \$20 each
- (24) Yetter Shark tooth row cleaners from a White 9824 planter- all 24 for \$6,000
- Used Raven 450 Console Only- make offer
- DJI Phantom 3 Professional Frequent Flyer Kits- \$1,600
- Used DCM 300 Verizon Modem Asset Tracking kits (no unlocks) with asset tracking cable- \$200

Software and Firmware

- 20/20 SeedSense and YieldSense- 2017.3.2
- iOS iPad System Software- 10.3.1
- FieldView Cab App- 6.2.6
- Climate FieldView App- 4.7.0
- Trimble Ag Software (Formerly Farmworks)- 2017.02
- Nav2 and 3 AutoPilot Controllers- 13.20
- CFX 750- 7.71
- FMX- 10.01 or (10.11 needed for CenterPoint RTX Fast users only)
- TMX 2050- 4.6.1
- DCM 300 Modem- 7.4.8
- Ag 372 Receiver- 7.20
- InCommand 800 and 1200- 2.2
- Integra, Versa, or Compass- 7.1
- SMS Desktop- 17.2

Precision Planting/ John Deere Termination of Agreement

As many of you were aware, in November 2015 the Climate Corporation was in the works to sell the Precision Planting company to John Deere. On May 1st, the Climate Corporation announced the termination of their agreement for John Deere to acquire Precision Planting. The Climate Corporation still intends to sell the Precision Planting equipment business and has spoken with several third parties that have expressed interest in purchasing it. I know this message still doesn't answer all the questions you may have; however, as always I will try to keep you informed.

(Statement from Precision Planting)

“This announcement does not change our focus or commitment to produce and support innovative precision ag technology. Spring planting is well underway, and our team is focused on ensuring you finish off a successful planting season. We are looking forward to announcing some exciting new programs this summer.”

Trimble Trade in and Financing Programs

Trade in Program-

Now until June 23rd, 2017 Trimble is offering a trade in program towards unlocks for a CFX 750, TMX 2050, or Ag 372 receiver. Trade in value in unlocks determined on what item being traded in is. Any Precision Farming items from new John Deere display to old FMDs, Insights, Ag Leader displays, Outback, Raven, old Trimble receivers, ect..... available for trade in. Questions on if your older Precision items qualify, let me know.

Financing-

Two programs are available through Trimble. Minimum purchase must be \$12,500. Expires 5/31/2017.

3 year, 0% interest= first payment due up front, followed by 2 annual payments

5 year, 2.90% interest= first payment due up front followed by 4 annual payments

Trimble New Parts 15% Off, Limited Time

We have the following listed Trimble parts 15% off while available. If wanting to trade in displays, discounts will still apply on top of trade in unit. Parts are brand new and come with full factory warranty. Items can be split up, it is not a one for all deal. Any questions or interest, let me know as soon as possible.

- (1) TMX 2050 Displays
- (2) Basic accuracy to High accuracy Unlocks
- (2) RTK 900 MHZ radios for TMX 2050
- (1) Nav3 Controllers
- (2) Verizon DCM 300 Modems
- (1) Vehicle Sync Unlocks for TMX 2050
- (2) Field IQ Full Harness Kits
