

Trimble Trade and Aid Fall Promotion

Linco Precision and Trimble Ag are pleased to announce the Trade and Aid program valid now through Dec 21st, 2018. During this promotion, Trimble will be offering rebates on certain parts and unlocks listed below in form of a virtual prepaid gift card. Also, Trimble will be offering 75% off accuracy unlocks in a GFX 750 display, and 100% off accuracy unlocks in a TMX 2050 display when you trade in applicable equipment. The trade in portion of the program is valid until Dec 28th, 2018. Attached is also a sheet on the GFX 750 and the TMX 2050.

Trade in Program

Trade in any the following displays or receivers and receive 75% off accuracy unlocks in a GFX 750 display, or 100% off accuracy unlocks in a TMX 2050 display. The accuracy unlocks level depends on what display or receiver, and what features that display or receiver has. Let Andy know and I can tell you what trading in would be worth. Also if not applicable for the trade in program, Linco Precision still may be interested in trade ins.

OPI Fall Program

OPI Advanced Grain Management systems is now offering discounts on products now through November 15th, 2018. The offer is on new or upgraded OPI Blue systems, and it must be ordered between now and November 15th, 2018 and paid in full by Dec 31st, 2018. OPI Blue is a wireless system that monitors your grain with moisture and/or temperature cables and can automatically run your fans based of grain temp and moisture readings as well as the weather conditions. It reduces fan run time, and can re hydrate soybeans if weather permitting.

- Order between \$3,000- \$5000 in parts or a system and receive \$250 off
- Order between \$5,000- \$10,000 in parts or a system and receive \$500 off
- Order between \$10,000- \$20,000 in parts or a system and receive \$1,200 off
- Order between \$20,000+ in parts or a system and receive \$1,500 off

We have installed systems for growers with one bin, and for major grain handling operations. Find out more today from any of our sales professionals.

Linco Precision now a Shield Ag Dealer

This fall, Linco Precision partnered with Shield Ag. Shield Ag has been designing, manufacturing and distributing innovative agricultural products for more than 50 years in Hutchinson, KS. Their complete product line is available throughout the Midwest and World Wide. From the Toolbar to the Soil, Shield Ag manufactures a complete line of fertilizer application gear, including a wide variety of fertilizer knives, complete row units, shanks and clamps. Their Acra-Plant line expands Shield Ag's fertilizer application equipment into No-Till and Min-Till environments. From "Bag-to-Bin", Shield Ag has a full line of high-capacity, low damage seed and grain handling equipment. Shield Ag belted grain and seed conveyors are designed for high volume grain movement with minimal damage to the commodity.
