

Trimble. TRADE + AID

Trimble Ag Customer Rebate Program

Are you concerned about the impact trade disputes and tariffs will have on your end of year purchasing? You're not alone. With equipment prices on the rise and commodity prices falling, it's no secret that these effects will be felt far and wide throughout the agricultural community.

Trimble's Trade **AND** Aid program aims to provide timely relief in these times of uncertainty. For a limited time only, Trimble Agriculture is offering customers the best of both worlds by bringing trade and aid together to help farmers upgrade their fleet at prices that can't be beat.

How It Works

Trade up old legacy and/or competitor displays and save on accuracy licenses with new purchases of Trimble displays, the TMX-2050 and GFX-750.

Earn cash back with discounts as high as **45% off** original list price when buying select Trimble products.

Don't Miss Out! In order to apply for the rebate, customers must purchase qualifying Trimble products by **June 28, 2019**

Out with the old, in with the new.

Trade in your old display & upgrade to the best of Trimble's Android-based display systems.

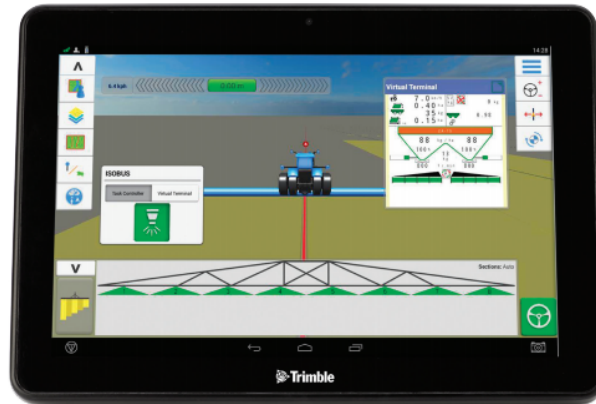

GFX-750 Display System

10" (25.6 cm) high-definition touch-screen guidance display and NAV-900 roof-mounted guidance controller

TMX-2050 Display System

Large 12.1" (30.8 cm) high-definition touch screen guidance display with sharp visuals and a bigger, clearer image.
Go Big or Go Home. Unlock advanced features with the TMX.

Trade in Program

Trade in any the following displays or receivers and receive 75% off accuracy unlocks in a GFX 750 display, or 100% off accuracy unlocks in a TMX 2050 display. The accuracy unlocks level depends on what display or receiver, and what features that display or receiver has. Let Andy know and I can tell you what trading in would be worth. Also if not applicable for the trade in program, Linco Precision still may be interested in trade ins.
